Education

BS, Institute for Interdisciplinary Information, Tsinghua University   Expected 07/2024
Overall GPA: 3.95/4.00

Awards and Honors

Competitive Mathematics

1st Prize in National High School Mathematics Olympics Competition	11/2019
1st Prize in National High School Mathematics Olympics Competition	11/2018
Silver Medal in S.-T. Yau College Student Mathematics Contest on Probability and Statistics (rank 3)	05/2021
Bronze Medal in S.-T. Yau College Student Mathematics Contest Team Track	05/2021
Silver Medal in S.-T. Yau College Student Mathematics Contest on Probability and Statistics (rank 3)	09/2022
Silver Medal in S.-T. Yau College Student Mathematics Contest Team Track (rank 2)	09/2022

Honors

Comprehensive Merit Scholarship of Tsinghua	10/2021
Comprehensive Merit Scholarship of Tsinghua	10/2022
Silver Medal in Yao Award (top scholarship in IIIS; 3 student institute-wide)	09/2023

Experience

Research on the interpretability of Transformers when trained on Dyck Grammar   02/2023 –05/2023
Core group member, Supervised by Andrej Risteski, CMU
- Investigate the loss landscape of 2-layer Transformers when trained on GPT task on bounded depth Dyck Grammar.
- Exhibit a variety of "uninterpretable" attention patterns that can perfectly generate Dyck through theoretical calculation and empirical validations.

Research on the limiting dynamics of Sharpness Aware Minimization   06/2022 –09/2022
Core group member, Supervised by Zhiyuan Li and Tengyu Ma, Stanford
- Investigate the limiting flow of Sharpness Aware Minimization when the learning rate and perturbation radius converges to 0 under the assumption that global minimizers form a Riemannian manifold
- Provably show different implicit bias for Sharpness Aware Minimization in full-batch and stochastic settings
- Show the necessity of the stop gradient step by proving that without which the method will have a different bias

Research on understanding soft prompt tuning via neuron activation pattern   08/2021 – 04/2022
Core group member, Supervised by Xiaozhi Wang and Zhiyuan Liu, Tsinghua NLP Lab
- Discover highly predictive neurons in pretrained language model which consistently emerges in prompt tuning
- Show the importance of these neurons to the performance under various ways of parameter-efficient tuning

Skills

Languages: Familiar with Python and has written C++, R, Matlab, Bash
Maths: Familiar with mathematics analysis, measure theory, linear algebra, abstract algebra, probability theory, statistics, causal inference, and discrete mathematics
Leadership: Class Monitor of Yao Class from 2021 to 2024
Miscellaneous: Chinese debating (PB: rank 2 school-wide), science fiction novel writing
